AT A GLANCE

100,000+
students trained globally in robotics, AI & STEM

11+
years as a STEM trainer and educator

17
NASA Space Apps event locations organised across India, UAE & Europe

2
FIRST Global Challenge world medals for the UAE — Gold & Silver

ROLES & AFFILIATIONS

- **Founder & CEO**
  Unique World Robotics LLC, Dubai
- **National Organiser**
  FIRST Global Challenge, UAE
- **Local Lead & Jury**
  NASA Space Apps Challenge
- **Managing Director**
  Synergen Group India
- **Judge**
  FIRST LEGO League & FGC events

EDUCATION

- **B.Tech, Electronics & Computer Engineering**
  Amal Jyothi College of Engineering, Mahatma Gandhi University, Kerala, India — 2010

Bansan Thomas George

Founder & Chief Executive Officer — Unique World Robotics

STEM & Robotics Education Leader · Edupreneur · Mentor · Future-Tech Evangelist

Profile

Bansan Thomas George is a Dubai-based edupreneur, engineer, and educator with more than a decade of experience building future-technology learning ecosystems across the UAE and India. As Founder and CEO of Unique World Robotics (UWR) — a STEM.org-accredited robotics and AI education organisation headquartered in Dubai and operating across the UAE (Dubai, Abu Dhabi, Fujairah) and India (Kerala, Bangalore, Kochi) — he has led the training of over **100,000 students globally** in robotics, artificial intelligence, coding, and space technology.

His work directly advances the UAE's national vision of becoming a global hub for science, innovation, and future skills: he serves as **National Organiser of the FIRST Global Challenge (FGC) for the UAE**, has led UAE student teams to Gold and Silver medals on the world stage, and has organised some of the world's largest NASA Space Apps Challenge events. Beyond competition success, his impact spans teacher upskilling, AI curriculum development, school partnerships, university admissions mentoring, and grassroots community outreach.

Representing the UAE on the World Stage

GOLD	**FIRST Global Challenge — Gold Medal, Panama 2025** UAE national team, trained and led as FGC UAE National Organiser
SILVER	**FIRST Global Challenge — Silver Medal, Athens 2024** Back-to-back podium finishes for the UAE at the Olympics of robotics
NASA	**NASA Space Apps 2022 — Global Finalist + 7 awards** UAE student teams selected from 31,561 participants across 162 countries
FTC	**FIRST Tech Challenge — 3rd Place, Inspire Award, 2026** Team UFORCE 23400 at the Michiana Premier Event, Indiana, USA

Robotics Competition Leadership

- **FIRST Tech Challenge (FTC):** founder-mentor of Team UFORCE 23400, which competed at the Multinational Tech Invitational hosted at the Johns Hopkins Applied Physics Laboratory, USA, alongside its Inspire Award podium at Michiana.
- **World Robot Olympiad (WRO):** mentored history-making, award-winning teams at the WRO international finals, and represented the UAE at WRO as team leader.
- **FIRST LEGO League (FLL):** led an eight-student UAE team to international recognition at the FLL Morocco Open International 2023, a gathering of teams from 48 countries.

BTG

CAREER MILESTONES

- **2010**
  Graduates in Electronics & Computer Engineering, Kerala
- **2010s**
  CMO & shareholder, Inker Robotics — RoboPark & RoboMaker R&D
- **Founding UWR**
  Builds a STEM.org-accredited education ecosystem from Dubai
- **2022**
  NASA Space Apps Global Finalist mentorship; represents UAE at WRO
- **2023**
  FLL Morocco Open International with the UAE's Team Googly
- **2024–25**
  FGC Silver (Athens) & Gold (Panama) as UAE National Organiser
- **2026**
  UFORCE 23400 podiums at Michiana; competes at Johns Hopkins APL

COMMUNITY ROLES

- Core Team Member, Headstart Network Foundation — startup mentoring
- Speaker, career coach & mentor on future technologies
- Advisor to UAE schools on olympiad & STEM pathway strategy

Space Technology & NASA Space Apps

- **UAE Local Lead, NASA Space Apps Challenge (Abu Dhabi)** and NASA Space Apps jury member.
- Under his leadership, UWR became the **world's largest NASA Space Apps Challenge event organiser** for two consecutive years, running 17 event locations across India, the UAE, and Europe.
- Mentored UAE student teams to a **Global Finalist award and seven additional awards** at NASA Space Apps 2022 — the world's largest annual hackathon.

Education Leadership at Unique World Robotics

- Built UWR into a **STEM.org-accredited international organisation** delivering K–12 and university-level programmes, robotics lab setups, and specialised training for students, teachers, and professionals.
- Designed and delivered **teacher professional development at scale**, including the UWR STEM Educator Upskilling Program and STEM.org-accredited AI CPD training aligned to IB AI Fluency frameworks.
- Developed **STEM profiling and university-admissions roadmaps** guiding UAE and Indian students toward top global universities through research, olympiads, and competition portfolios.

Community Impact & Volunteering

- Grassroots outreach bringing robotics and AI learning to underserved communities, including **free community robotics and AI sessions in Fujairah**.
- Partner to the **ONEX Foundation** on a community outreach roadmap spanning school hackathons in India, sports facility development in Kerala schools, and FIRST FTC team sponsorship in the UAE.
- Outreach partner for the **Planetary Stories Global Children's Storytelling Competition** across UAE and Indian school communities.

Alignment with the UAE's Vision

Bansan's mission is to position the UAE as a land of scientific development and innovation, in line with the UAE Government's vision for a knowledge-based economy. Through national competition leadership, large-scale space-science events, teacher capacity building, and inclusive community programmes, he has created a pipeline that takes Emirati and UAE-resident students from their first robotics kit to the global stage — winning medals for the UAE, earning NASA recognition, and building the innovators the nation's future demands.

> *"Our recent success is not a one-off achievement — we intend to make it a tradition. Our vision is to ignite a passion for future technologies among students, from their first robotics kit to the world stage."*
